Professional Web Design with PHP Laravel and Vue.js

About This Training

This program is designed for aspiring web developers who want to build modern, dynamic, and responsive websites using **PHP Laravel (backend framework)** and **Vue.js (frontend JavaScript framework)**. The course blends **web design principles** with **practical full-stack development skills**, ensuring participants can create visually appealing and highly functional web applications.

Learners will gain **hands-on experience** in both designing user interfaces and developing scalable backend systems, preparing them for **professional roles in web development and software engineering**.

Curriculum

#	Topic	Description
1	Web Design Foundations	HTML5 essentials CSS3 styling and layout techniques JavaScript basics & DOM manipulation Responsive design with Bootstrap UI/UX design principle

Fees

Regular: Tk. 10,000.00
